

STEM resources

This list of resources helps support you work with your students who are interested in discovering more about STEMM careers in Australia, including activities and narratives about what being a STEMM professional is like and showcasing diverse pathways.

Resources for parents and carers

STEM HUB	The resources on STEM HUB are designed to help students discover more about STEM, including the pathways into STEM careers.	https://learningplace.eq.edu.au/cx/resources/file/5da759ed-285d-4132-b8e8-58198109fb03/1/html/resources.html
CSIRO digital careers: career hub	The Careers Hub supports teachers, parents and careers practitioners as they help students to plan for a lifetime of different roles. The site includes features on digital skills and digital career profiles. The site has a dedicated section for parents.	https://digitalcareers.csiro.au/en/Careers-Hub
Australian Government STARportal	The STARportal makes connections which might inspire young people to explore, discover and create. The portal links to a comprehensive collection of STEM activities and providers.	https://starportal.edu.au/
A Parents' Guide to Careers in Science, Technology, Engineering and Mathematics	This booklet is designed to encourage STEM talent by suggesting ways to maximise students' interests. The guide includes links to resources such as Future Morph, which highlights careers in STEM using language which is appropriate to a school-age audience.	http://www.ingenious-science.eu/c/document_library/get_file?uuid=ff04ce70-ec5f-48c6-9b66-

The employABILITY STEM toolkit was developed with the support of the Western Australian Government as part of a Future of STEM project conducted in 2019.
